SPECIAL DISCOUNTS

if you purchase large quantities of lining out evergreens for Xmas Tree Plantations, reforestation, woodlots, or for any other purpose, write us for special quotations. Also, if you make annual purchases in large quantities, ask about our growing agreements, which save many of our customers large sums of money, and assures them of a dependable supply of quality trees

ARBOR VITAE

Am. Arbor Vitae (Thuya Occidentalis)

We have a large quantity of these excellent American Arbor Vitae seedlings and transplants and are offering them at a reduced figure. These are some of the best we have ever grown. Seed was collected by ourselves from upland specimen trees, in this northern Wisconsin Area.

Birch, White (Betula Papyrifera)
Best variety for growing birch clumps. Always in great demand.

	100	1000
1-1½ ft. sdls.	20.00	190.00
1½-2 ft. sdls.	30.00	285.00
2-3 ft. sdls.	40.00	

CHRISTMAS TREES

Approximately 25 million Christmas trees are used in this country annually, and the growing of them in commercial plantations is getting to be a very lucrative business. Good planting stock is imperative for success. We grow large quantities of transplants for this very purpose and can supply quality trees at reasonable prices. Plant a few acres every year and you will soon have a nice annual income. We would be happy to advise you on soil, cultural practices etc.

<u>Balsam Fir</u>	100	1000
6 year transplants 9-12 in.	15.00	140.00

<u>Norway Spruce</u>		
4 year transplants 5-10 in.	8.00	70.00

<u>Scotch Pine</u>		
4 year transplants 6-12 in.	9.00	85.00

<u>Norway Pine</u>		
4 year transplants 7-12 in.	12.00	110.00

The above are the most used varieties, altho Douglas Fir, White Spruce, and other varieties of Pine are also used in some localities. If you are interested write for special quotations.

PLANT NOW FOR A STEADY INCOME LATER

FALL PLANTING

There has been a lot of pros and cons in recent years on fall planting. Some growers swear by it and others will have nothing to do with it. We have done a lot of experimental planting in the fall and in recent years have done considerably more of it and this year we are planning to do the major portion of our lining out in the fall.

We have observed a few things, and are glad to pass on our experience. First of all, it has been our observation that any of the Spruce, Pine and Fir family transplant very well, even as early as the later part of August and certainly the fore part of September. These varieties mature very early, and by planting them the later part of August or the early part of September, you give them an opportunity to make considerable root growth before freeze-up. Immediately following planting, we give them a thorough soaking regardless of the weather. This gives the soil a chance to become firmly compacted and is conducive to an early and prompt root growth. Then during the fall, if we should have dry weather, it is well to water them occasionally. Also, shortly after planting we sometimes scatter oats in the block and cultivate it lightly to cover the oats up as much as possible. This will grow and offer an excellent ground cover for the trees in event we have an open winter, and would prevent to quite an extent heaving in event there is a lot of intermittent freezing and thawing. On varieties such as Arbor Vitae, and Junipers, we would suggest that they not be planted until the later part of September but otherwise the procedure is the same for we have found that these grow a little later in the season than do the Spruce, Pine and Fir family.

There is no question, but what fall planted trees start growing much earlier in the spring and make a larger growth the first year than do spring planted ~~trees~~ and we also know that over a period of years, one will have as good or better stands of fall planted stock than you will spring, because there is just as much danger of loss from a hot dry summer following a late spring planting than there is danger of injury due to an adverse winter following fall planting.

If properly done and properly handled, we are very enthusiastic about fall planting.
